Company profile

Your end-to-end technology partner from idea to scale.

Technology & Software Solutions — 15 professional services for businesses and software companies

Our mission

To give every business access to world-class engineering — with the reliability of an in-house team and the flexibility of a partner.

Our vision

To be the most trusted technology partner for software companies and growing businesses in the region and beyond.

Who we work with

Software houses

Extra capacity and specialist skills — QA, DevOps, security — on demand, white-label if you need.

Startups

From idea to MVP to scale, with a team that thinks about product, not just code.

Enterprises

Modernization, cloud migration, security audits and long-term support with SLAs.

15 services. Six practice areas. One accountable team.

Software Development

01 Web Development
Websites, SaaS platforms, dashboards and admin systems built for speed and scale.

02 Mobile App Development
Android and iOS apps with Flutter, React Native and native technologies.

03 Backend & API Development
REST & GraphQL APIs, backend systems, databases, authentication and integrations.

04 Custom Software & SaaS
Custom systems, ERP, CRM, business management and subscription platforms.

AI & Emerging Tech

05 AI & Generative AI Solutions
AI applications powered by LLMs, RAG, AI agents and intelligent chatbots.

06 Data Engineering & Analytics
Data processing, pipelines, reporting, analytics and dashboards.

Cloud & DevOps

07 Cloud Solutions & Migration
AWS, Azure and Google Cloud setup, migration to the cloud and infrastructure management.

08 DevOps & CI/CD
Docker, Kubernetes, GitHub Actions, Jenkins, Terraform and deployment automation.

QA & Cybersecurity

09 Software Testing & QA
Manual, automation, API, mobile and performance testing.

10 Cybersecurity & Penetration Testing
Application security testing, web pentesting, API security, vulnerability assessment and audits.

11 DevSecOps & Application Security
Security built into your SDLC: code security, dependency scanning and CI/CD security.

Design & Product Engineering

12 UI/UX Design
Interfaces for websites and apps, prototypes, wireframes and design systems.

13 Software Architecture & Consulting
Architecture reviews, technology selection, database design, code review and performance tuning.

Business & Technical Support

14 Dedicated Development Teams
Flutter, backend, frontend, QA and DevOps engineers via outsourcing and staff augmentation.

15 Software Maintenance & Support
App maintenance, bug fixes, system updates, server monitoring, backups and technical support.

Flexible engagement models built for software companies

Project delivery

We own the outcome end-to-end: scope, design, build, test and launch.

Best for: Startups & new products

Dedicated team

A cross-functional team that works exclusively on your product, long term.

Best for: Growing products

Staff augmentation

Vetted engineers join your existing team and follow your processes.

Best for: Software houses

Care & support

Maintenance, monitoring and improvements after launch with a clear SLA.

Best for: Live systems

A clear process, from first call to long-term support

01

Discover

Workshops to understand goals, users, constraints and success metrics.

02

Design

Architecture, UX flows and prototypes validated before a line of code.

03

Build

Two-week sprints with demos, code reviews and transparent progress.

04

Secure

Automated testing, security scanning and pentesting before release.

05

Launch

CI/CD, cloud setup, monitoring and a smooth go-live.

06

Support

Maintenance, improvements and on-call support as you grow.

Commitments you can count on from day one

NDA before anything else
We sign a non-disclosure agreement before you share any idea, code or data.

Free team member replacement
If someone isn't the right fit, we replace them at no extra cost.

Documented handover
Every engagement ends with documentation, access transfer and a handover session.

You own 100% of the code
All source code, designs and intellectual property are transferred to you.

Start with a trial period
See how we work on real tasks before you commit long term.

Full transparency
Access to the repository and task board from day one, with weekly demos and reports.

Experience across the sectors that matter

Software houses
Extra capacity and specialist skills for agencies and software companies — under your brand if you need.

Startups & SaaS
From idea to MVP to scale, with a team that thinks about the product, not just the code.

Fintech
Secure, compliant financial products — payments, wallets, lending and reporting.

E-commerce
Fast stores, marketplaces and apps that convert — and stay up on your busiest day.

Healthcare
Patient-friendly apps and secure systems for clinics, labs and health startups.

Education
Learning platforms, school systems and apps that teachers and students enjoy using.

Logistics
Tracking, dispatch and warehouse systems that give you a live view of every shipment.

Government & enterprise
Modernization, security and long-term support for large organizations.

Let's build something remarkable together

Tell us about your goals and we'll get back to you within one business day with next steps.
